Prime Product Overview

Overview

Not only can Prime allow users to define long-term vision and mission, but also splits them into the following parts:

- Vision(Grouping of Priorities)
  - Priorities (Grouping of Goals)
    - Goal (Grouping of Performance Indicators)
      - Performance Indicator (results baseline)
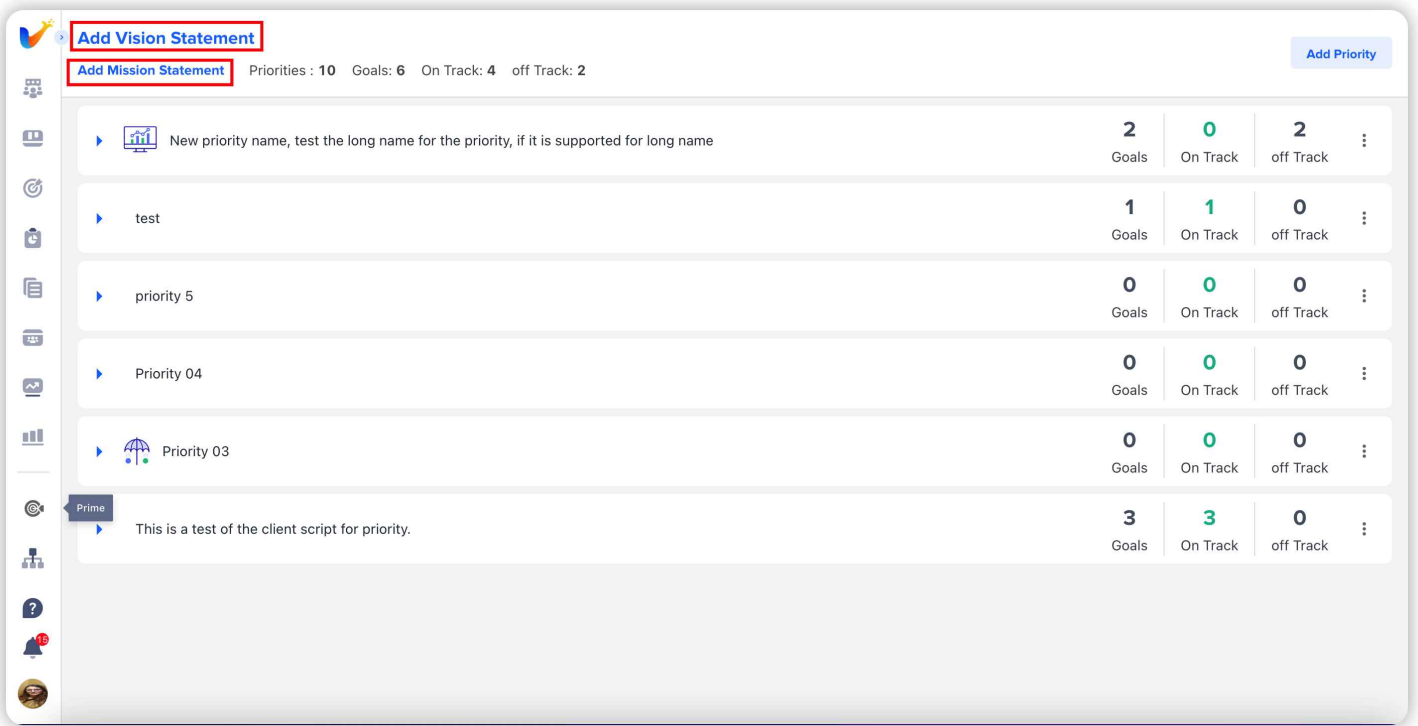

- Program (Grouping of projects)
  - Project (Grouping of workspaces)
    - Workspaces
      - Tasks

For instance, one goal is to build 40 schools in Muscat. This goal has its own workflow (Programe > Project > Workspaces > Streams > tasks)
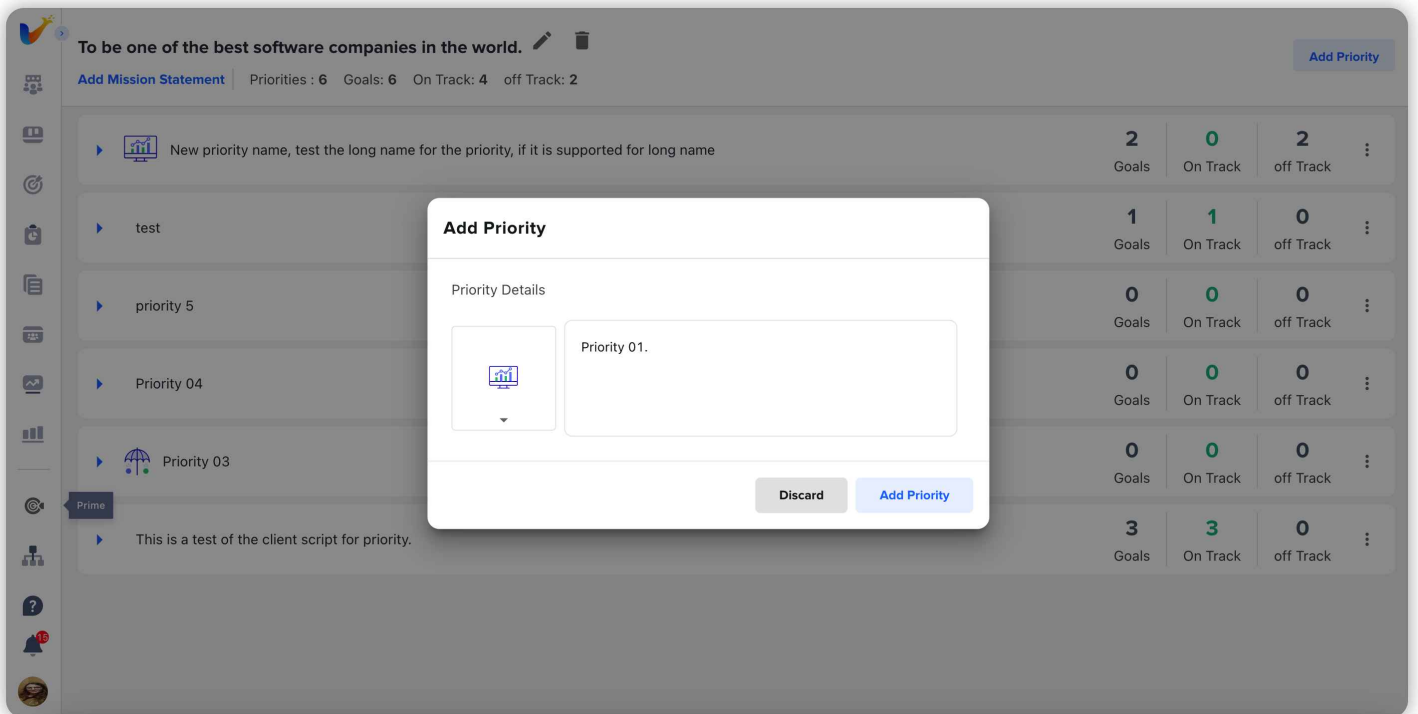

Add Organizations Vision & Mission

First of all, the user can add vision and mission by clicking the "Add Vision Statement" and "Add Mission Statement" button.
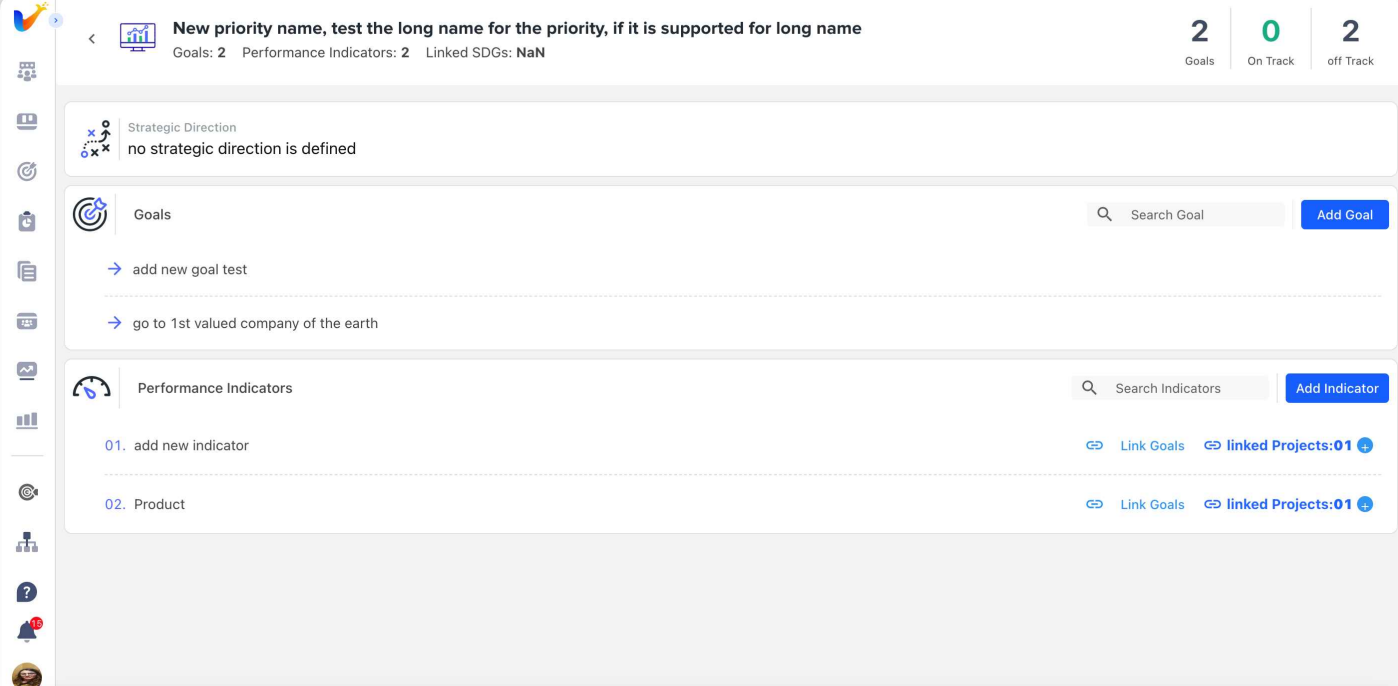

Add Priority

The users can add priorities under the vision and mission statement.

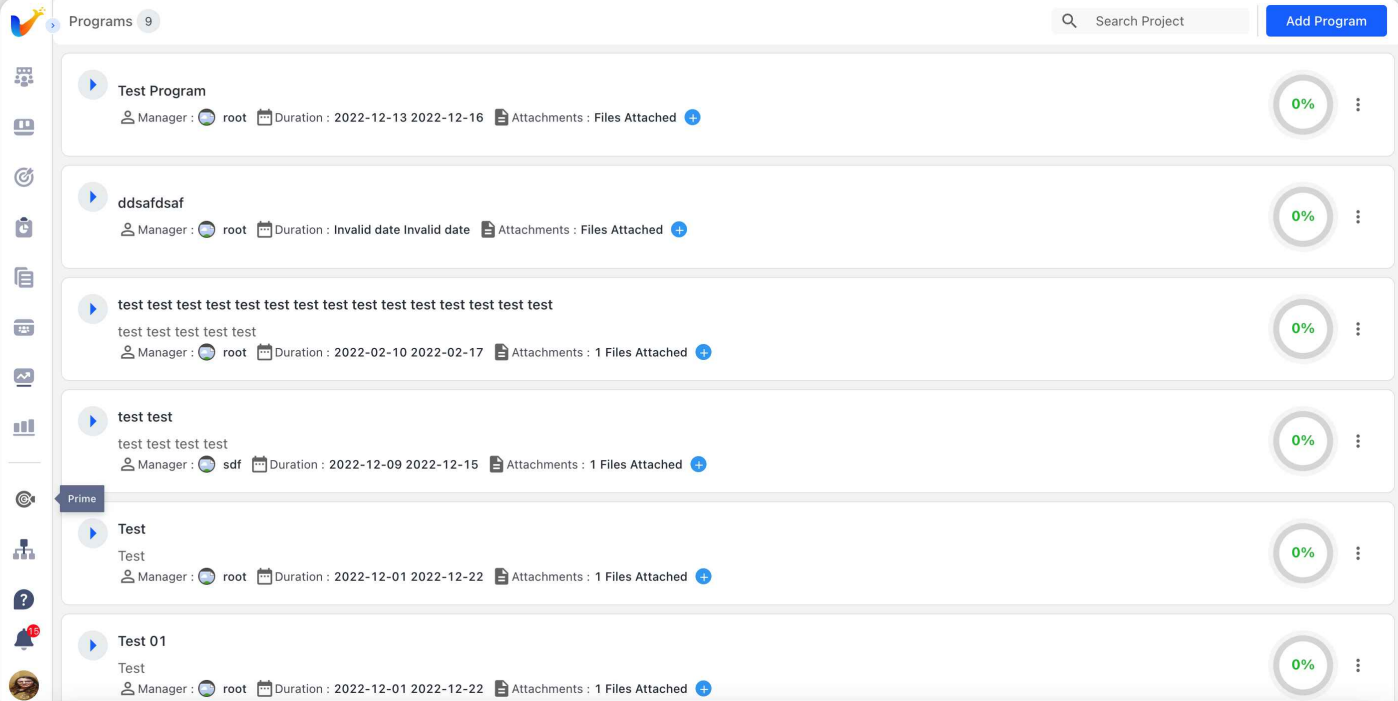

Add Goals and Performance Indicators

The users can add goals and performance indicators under priority.

# Add Programs

Users can add multiple programs under Prime.

Create projects under a program

Users can create multiple projects directly under a program.

Link projects under a program

Users can also link pre-existing projects to a program.

Add Projects

Users can create multiple projects in the "Project" module of Prime.

Link the project to a program

By clicking the "Link Program" button on the top bar of the project, the user can link the current project to a pre-existing program. Once the program is linked, it will show on the left of the "Link Program" button.

Create a project

By clicking the "Create New Project" button on the right, the user can initiate the process of creating a project.

After going through the major steps of "Project Description", "Project Details" and "Project Phases", the user will be able to create the project successfully.

Link workspace stream in project phase

The user can link a pre-existing workspace stream to a project phase.
